What’s Happening?
The Oregon Department of Environmental Quality is sponsoring a collection event for conditionally exempt generators of small quantities of hazardous waste. This event provides an opportunity for small businesses to properly and conveniently dispose of their hazardous waste.

State environmental regulations require ALL Oregon companies producing hazardous wastes to manage and dispose of them properly. Disposal options for conditionally exempt generators are often viewed by companies as complicated and costly. This program is designed to allow companies to dispose of hazardous waste in a simpler and less costly manner.

To participate, generators will be required to pay the total cost of disposing their wastes and billing arrangements can be made.

What Kinds of Businesses Can Participate?
Conditionally exempt generators (CEGs) of hazardous waste are businesses, industries, and institutions producing less than 220 pounds of hazardous waste per month during each of the last 12 months. Generators are allowed to dispose of up to 2,200 pounds of hazardous waste at this collection event (about four drums).

In order to dispose of waste at this event, companies are required to apply for and receive prior approval from Clean Harbors Environmental Services for specific types and quantities of waste.

Applications must be received by Clean Harbors no later than Aug. 26, 2016. See page 3 for the application form. Businesses producing more than 220 pounds of hazardous waste each month must manage their hazardous wastes following stricter regulations and are NOT eligible to participate in this event. Generators of larger quantities of waste can contact Oregon DEQ at (503) 378-5071 for more information.

What Hazardous Wastes Could My Business Have?
Hazardous wastes are wastes that are flammable, corrosive, toxic, or reactive. Some examples of common hazardous wastes that will be accepted at the collection project are:

- parts-washer solvents
- paint-gun cleaners
- dry-cleaning solvents
- cleaners/degreasers
- thinners
- paint strippers
- corrosives
- fluorescent light ballasts
- inks
- mercury
- photographic fixers
- plating wastes
- batteries
- laboratory chemical wastes
- pesticides/herbicides/
- insecticides

Small Business Hazardous Waste Collection Event
FRIDAY, SEPTEMBER 9, 2016
Information and Application
How Much Will It Cost?
Wastes will be charged at the rates listed on the last page of the attached application form. Instructions for completing the waste inventory sheet are on the third-to-last page. Only wastes that have been pre-registered and approved by Clean Harbors Environmental Services will be accepted at the collection event. Remember you are limited to no more than 2,200 pounds of Conditionally Exempt Generator waste at this event. There is no quantity limit for collection of waste pesticides.

Waste disposal charges are due prior to collection of the waste and may be in the form of cash, check, money order or credit card. Any billing arrangements must be made in advance with Clean Harbors Environmental Services.

What Wastes Will Not Be Accepted?
- radioactive materials
- ammunition or explosives (check with local police dept.)
- infectious (medical) wastes
- asbestos or other solid waste
- very reactive wastes
- unknown wastes

Return your application by Aug. 26, 2016 to:
E-MAIL (PREFERRED): Taylor Simpson,
simpson.taylor@cleanharbors.com
MAIL: Clean Harbor Environmental Services
       16540 SE 130th Ave.
       Clackamas, OR 97015 — Attn: Taylor Simpson
FAX: (503) 655-3952 — Attn: Taylor Simpson

For More Information on this Event, call or e-mail:
Taylor Simpson (503-742-7106);
simpson.taylor@cleanharbors.com.

PaintCare will be accepting waste paint at this event free of charge. To find out what products qualify for this program, go to: http://www.paintcare.org/oregon/products_fee.php

Used oil can be recycled off for free at the Roseburg transfer station, I-5 exit 121, McLain Ave., Roseburg, OR

How Can My Company Participate?
Step 1: Determine if your company is eligible to participate by evaluating your waste streams. Be sure you are not registered as a small or large quantity generator with Oregon DEQ or U.S. EPA.

Step 2: Fill out the attached application form and return it to Clean Harbors Environmental Services. Include any applicable Safety Data Sheets (SDSs) or lab results available on the waste. Estimate your cost for disposal using the waste inventory sheet. Be sure to sign the certification statement stating that your company is a conditionally exempt generator.

Step 3: Once Clean Harbors Environmental Services has received and reviewed your application, you will receive a letter and/or telephone call acknowledging acceptance of your application. The acknowledgment letter and/or call will provide you with the total estimated cost for disposal of your waste, an appointment time for bringing in your waste, and any changes to the collection event site.

Step 4: On Friday, Sept. 9, 2016, at your scheduled time, bring your wastes to the collection site. As a conditionally exempt generator, you are allowed to transport your own waste to the site. Make sure that the waste containers are covered and in sound condition. Take proper care to avoid spillage or exposure to the waste during transport.

NOT SURE IF YOUR BUSINESS IS CONDITIONALLY EXEMPT? NEED HELP DETERMINING IF YOUR WASTE IS HAZARDOUS?
FOR ANSWERS, CALL OREGON DEQ AT 503-378-5071.
Waste Collection Event Application Form for Conditionally Exempt Hazardous Waste Generators

All forms must be submitted to Taylor Simpson two weeks before the scheduled event. Email is the preferred method of submitting application forms.

2. Inventory of wastes you want to dispose of at this collection event

Please complete the attached waste inventory sheet to list the wastes you will bring to the collection event. Make additional copies of the inventory sheet if needed. Return the completed inventory sheet(s) with this application. Instructions for completing the waste inventory sheet are on the back side of the form. Only wastes that have been pre-registered and approved by Clean Harbors will be accepted at the collection event. Remember you are limited to no more than 2,000 pounds of Conditionally Exempt Generator waste at this event. Radioactive materials, explosives, infectious medical wastes, very reactive wastes, asbestos and other solid waste and unknown wastes are not accepted at these events.
State and federal hazardous waste regulations limit the use of CEG hazardous waste collection programs to those businesses that generate 100 kilograms (220 pounds or approximately 25 gallons) of hazardous waste per month. Businesses that generate more than this amount must use a licensed hazardous waste hauler to manifest and transport their waste. Therefore, we are requesting that you sign the following certification before disposing of your waste at the collection event:

I certify the business that I am representing is a Conditionally Exempt Hazardous Waste Generator who generates less than 220 pounds of hazardous waste and 2.2 pounds of acutely hazardous waste per month. I also certify that I have not accumulated more than 2,200 pounds of hazardous waste (2.2 pounds of acutely hazardous waste) at this time. I understand that I must pre-register and pay the disposal cost before I can drop off my wastes at the collection event. I also understand that only the types and quantities of wastes listed on the Inventory Sheet(s) in Section 2 have been approved by Clean Harbors for disposal at the collection event. Finally, I understand that the state, local government or Clean Harbors does not assume liability for my wastes, and that future liability remains with my business.

Note: This page must be completed and submitted with the application if you are disposing of CESQG waste at this event.
TRANSPORT TIPS

No safety precautions and protective measures can be suggested that totally eliminate risks. However, here are some suggestions that may assist you in minimizing exposure as you work with waste.

IF YOU HAVE A SPILL:
CALL 1-800-OIL-TANK
1-800-645-8265
FOR EMERGENCY ASSISTANCE

HANDLING WASTE MATERIAL:

1. Inspect containers. If, upon inspection, you have reason to suspect that the container will tear or rupture when moved, do not attempt to move or load the container for transport. Come to the collection site without it and we will provide assistance.

2. Wear the protective clothing and protective equipment (goggles, gloves, respirator, etc.) described on product labels when handling pesticides.

3. At a minimum, wear a long sleeved shirt buttoned at the wrist, a pair of chemical-resistant gloves, preferably a chemically resistant apron, rubber boots, goggles and a hat.

4. Have spill control materials available. For example, a 10-pound bag of commercially available safety absorbent, a shovel and a container for spilled material collected with the absorbent and contaminated soil may be useful in control and cleanup of a spill involving a small amount of material. Bring any spilled materials with you to the collection site for disposal.

FOR TRANSPORTING WASTE MATERIALS:

1. Inspect all containers to see that they are securely packaged. Only transport containers that are securely closed.

2. Line the storage area of the transport vehicle with plastic sheeting to contain any spillage that might occur and therefore simplify cleanup and decontamination.

3. Assure all labels are securely attached. This is important for disposal of these materials.

4. Arrange containers in your vehicle so that they are braced to prevent shifting which may result in container damage and/or leakage.

5. All containers should be kept dry during transport. Loads in open vehicles such as pick-up trucks should be covered in the event of rainfall.

6. Do not transport waste in a manner that will allow fumes from those wastes to enter the passenger compartment of the transportation vehicle.

DRIVE CAREFULLY. You are responsible for any spillage, damage, subsequent cleanup and restoration that might occur while you are transporting the wastes, whether the accident is your fault or other’s. The State and its contractor are not responsible for any spillage that occurs before the contractor at the collection site accepts the waste.
Instructions for Completing Waste Inventory Sheet

1. **Item Number**: Number each item (or category group of items) you want to dispose of at the collection event. Each item should have an individual number on its container as reference. The container number should correspond to the completed inventory sheet(s) submitted to Clean Harbors.

2. **Waste Description**: Describe, in as much detail as possible, wastes that you want to dispose of at the collection event. The description should include the chemical and trade name, how you use the material, physical state (i.e., liquid, solid, sludge, gas), chemical characteristics (e.g., flammable/ignitable), and chemical constituents and percentages from the label or material safety data sheet (MSDS). For pesticides (e.g., herbicides, fungicides, rodenticides, etc.), please include the EPA registration number if available, trade name and percent concentration. When listing waste quantities, be accurate as possible. **DO NOT** include waste you do not want to dispose of at the collection event, nor containers of unknown waste substances. Please avoid mixing your wastes together.

3. **Quantity**: List the quantity of waste you want to dispose of at the collection event. As a rule, list liquids in gallons and solids and sludges in pounds.

4. **Cost per Pound or Gallon of Waste Disposed**: Per pound pricing is for loose pack or lab pack items and per gallon pricing is for non lab pack items (over 5 gallons in size). Refer to waste disposal costs below. For wastes not listed on the Inventory Price Sheet, please call Clean Harbors at 1-253-638-3544 for a cost estimate.

5. **Disposal Charge**: Quantity of waste multiplied by the cost per pound or gallon will determine the disposal charge for each waste. Regardless of quantity, each item on the Inventory Sheet will receive a minimum charge of one pound or one gallon. For example, a quarter gallon of latex paint will have a minimum disposal cost for one gallon of latex paint.

6. **Total Charge this Sheet**: This box is the Disposal Charges column added together for each Inventory Sheet. For a business with multiple Inventory Sheets, the last Inventory Sheet should also list the sum of all the "Total Charge This Sheet" box from each Inventory Sheet. For questions, please contact Clean Harbors.

Once Clean Harbors has received and reviewed your application, you will receive a letter and/or telephone call acknowledging acceptance of your application. The acknowledgment letter and/or call will provide you with the total estimated cost for disposal of your waste, an appointment time for bringing in your waste, and any changes to the collection event site.
